Industrial legacy in America being torn brick-by-brick to China, India

The Washington Mills factory, that was a exceptional textile factory that was located in the Town of Mayodan, is now being **condemned** and to make matters worse the bricks from this historical marvel is being sold to Communist China and India. This I learned from a source named Michael Atkins a resident in the town of Mayodan which appeared before the Mayodan Town Council in April of this year to protest the destruction of the building and tried to get Town Attorney and State Senator **Phil Berger** and the whole town council to take any action possible to save the old factory but to no avail.

Now the factory over the months is being condemned brick-by-brick and sold to China and India, what a sad state of affairs to lose such a great factory.

You Gotta wonder why such good factories are being torn down and why they are abandoned in the first place instead of renovated and restored back to working order, well you can blame President Herbert Walker Bush also known as Bush Sr. and Bill Clinton both

for the NAFTA Trade Agreement and other free trade agreements. Under these free trade agreements any factory and/or business can outsource their operations to other countries to do the hard labor at a cheap cost. It sounded like a good idea at first glance as foreign labor was thought to be cheaper than labor in the United States but as products started being manufactured in foreign countries, the quality of material is far lower than what the quality would be in America. Now laptops only last 6 months or less in some cases or more in some cases. Everything now bought has evidence of deteriorated quality and now electronic equipment can fail more easily and quicker than if the product was made in America.

A request for an interview was given to Mr. Atkins months ago but was never returned.

According to the [News and Record](#) article, ““We do have plans to preserve some of the pieces in the mill, and we do want to save a part of the building and try to reuse it if the county will let us,” Nelson said. He also wants to develop the property into an RV park.” Isn’t that nice the old legacy factory will be destroyed then will turn into a RV Park which nobody will be able to use as the economy is being destroyed just like the Washington Mills factory. America is trillions in debt to the private Federal Reserve bank and China. Also it was revealed again by the News and Record that “a development group bought the old mill after its closure and planned to turn it into a gospel hall of fame and events center. But those plans didn’t materialize.” of course the mill was never turned into a gospel hall of fame and events center which would have given Mayodan a boost of economic growth but instead some of the small stores all over the town are going out of business causing the town to plunge into demise.

What America needs is re-industrialization instead of deindustrialization because if America ever gets entangled in World War III then all products from foreign countries may cease with anywhere from a trade embargo to full out attacks on cargo ships. When North Carolina Representative Bryan R. Holloway was contacted on the matter since the Federal Congresspeople don’t care about fixing the economy anymore, his staff explained that they couldn’t legally do anything to get factories back to North Carolina nor will the Congress ever end the free trade agreements until the United States of America falls into a primitive lifestyle before the industrial age.

The Town of Mayodan’s annual fiscal year 2012-13 [Operating budget](#) released on the old Town of Mayodan official website, now

removed from their site, reveals that the outstanding debt of Mayodan is \$4,208,980, likely to corporate megabanks. The proposed budget recommends a \$25,000 loan to purchase one police vehicle also according to the same budget document.

Share and Enjoy:
